

Učka 360° Camp - Bring the butterflies home!

Volunteers camp for meadow restoration in Učka Nature Park

From **12 to 24 July 2018** join us on the highest mountain in Istria and help us restore overgrown meadow to stop biodiversity decline.

Hop in for a few days or stay for two weeks! In our wild camp **accommodation and food are free**. Working and cooking in nature, we are learning about nature without modern day distractions. Did we mention the beach is not that far?

Hills of Učka Nature Park had used to be full of life, with meadows regularly maintained with cows grazing. As traditional farming was abandoned meadows remained unkempt slowly growing into thicket and forest. Along with meadows dying, a lot of **butterflies, birds and lizards have lost their home**.

Biom's mission is to restore wildlife's sanctuaries through direct conservation measures, as well to motivate people to reconnect with nature and to take part in it's protection.

12 - 24 July 2018

Sleeping in tents

(check for spare equipment in advance)

Cooking on camp fire and gas cooker

(food is provided by coordinators and is prepared by all participants)

Drinking water from the tank

Working hours:

every day 8 - 11 AM and 5 - 7 PM

10 km from Mošćenička Draga
